

- ▶ Quick and easy integration
- ▶ Low cost development interface
- ▶ Accept payments on your cash register, personal computer or laptop

Semi-Integrated @dvantage™ Vx570si

THE EASIEST WAY TO INTEGRATE PAYMENTS ON YOUR POINT OF SALE SYSTEM

With Global Payments' innovative Semi-Integrated @dvantage Vx570si solution, you'll enjoy the benefits of an integrated Point of Sale (POS) system without the significant costs, time delays, and complex work efforts often associated with them.

Operating on the VeriFone® Vx570 POS terminal, this new payment processing solution enables communication between your cash register and the POS device with incredible ease.

Enjoy fast and secure integrated payment processing. Leverage the latest technologies, including chip card acceptance and PCI DSS security. The Vx570si offers speed, flexibility and superior performance. Designed specifically for your business needs, this solution is the right one for you and your customers.

FEATURES

- ▶ Low cost development interface
- ▶ Process payments through your high speed internet service with dial back-up or a dial-up connection
- ▶ PCI-DSS security
- ▶ Credit and debit chip card acceptance including Visa®, Visa Debit, MasterCard®, Maestro®, and Interac® Direct Payments
- ▶ Eliminate manual re-entry of payment information

BENEFITS

- ▶ Quick to market with minimal costs, coding and certification efforts
- ▶ Faster transaction time to help you serve customers quickly
- ▶ Sensitive card data is neither transmitted nor stored in the cash register
- ▶ Provides state-of-the-art security features, safeguards transactions and reduces exposure to fraud and potential chargebacks
- ▶ Improve efficiency, reduce risk of errors, and maintain financial integrity
